

Business Sales Performance Analytics Dashboard Report

Task 1 – Data Science & Analytics Internship

Intern Name: SYED ABDUL MUQEETH

Organization: Future Interns

Objective

The objective of this project is to analyze business sales data to identify revenue trends, top-selling products, category performance, regional growth, profitability, and country-wise sales performance using interactive dashboard visualizations.

Tools Used

- Microsoft Excel (Data Cleaning)
- Microsoft Power BI (Dashboard Creation)

Dataset Used

Superstore Sales Dataset containing:

- Order Date
- Sales
- Profit
- Category
- Product Name
- Region
- Country
- Quantity
- Discount

Dashboard Visualizations Created

1. Total Revenue Generated

Shows total business sales as a KPI card.

2. Monthly Revenue Trend Analysis

Shows sales growth and decline over time.

3. Top 10 Best-Selling Products

Shows products contributing highest sales.

4. Sales Distribution by Category

Shows revenue share of each category.

5. Regional Sales Performance

Shows best performing business regions.

6. Profitability by Product Category

Shows most profitable categories.

7. Quantity Sold by Category

Shows categories with highest units sold.

8. Sales by Country

Shows country-wise revenue contribution.

9. Date Slider Filter

Interactive filter used to analyze sales by selected date range.

Key Insights

- Technology category generated highest revenue.
- Some countries contributed more sales than others.
- Top products generated major share of revenue.
- Certain categories had strong sales but lower profit.
- Regional performance varied significantly.
- Sales trends changed across months and years.

Recommendations

1. Focus marketing on high-performing countries.
2. Increase stock of top-selling products.
3. Improve low-performing regions.
4. Focus on profitable categories, not only high sales.
5. Use seasonal sales trends for better planning.

Conclusion

This dashboard provides complete business sales insights through interactive data visualization. It supports decision-making in sales growth, regional strategy, product focus, and profitability improvement.

This project improved practical skills in data analysis, Power BI dashboard creation, and business intelligence reporting.
